EPCE helps utilities and energy companies identify the best educational and training providers.

Kicking off the New Year with a New Online Program

Intended for individuals looking to expand their career opportunities, Bismarck State College's Nuclear Power Technology online degree is set to hire 1,200 people for Savannah River Nuclear Solutions. The U.S. Department of Energy is happy to announce this news, as this is a significant value for our future workforce. It is important that we empower the remaining nuclear work force and at the same time, as the U.S. nuclear industry continues to age, new experts need to be tested to be hired by the DOE.

Nuclear News

Including the story of Corrie Chitwood, who decided to pursue a degree in Business and Technology.

For Corrie, choosing to pursue a degree while working full time and raising four children was an achievement.

"I was very happy with the layout of Corrie's story and I think it will be very interesting to see how this will progress." - Michelle R. Weise, Senior Vice President, National Coalition of Career and Educational Partners, Education Partnerships Placement.
